
Highlights from this Meeting:

- AB meeting on Monday reviewed and approved the Retail Communications Service Device (UPOS1.16) submission from VINX.
- Vote for new chair's to server for the next 2 years with their term beginning at the end of the Amsterdam meeting: Andy Mattice and Leonid Rubhakin
- Ron Zahavi presented the progress of the Retail IoT Security Maturity Model.
- Roland Zalisevskij presented the current progress on the Fiscal API RFP. Good outline of elements and requirements from 12 of the listed tax authorities.
- Andy Mattice and Vivian Underwood shared their progress and strategy for the Location standard. A community workteam will work on adding new use cases and submitting the resulting updated proposal as an RFC to become a OMG standard.
- Thursday continued with engaging discussions on the uses and supporting elements needed to enhance the adoption of AI and machine learning in Retail. There is interest in writing an AI in retail paper.
- John Glaubitz lead the retail ontology working session where in-depth discussions ensued to clarify the definitions for: Services, Transactions, Orders and Tender types.
- The meeting concluded with a short review of our roadmap and deliverables. We enjoyed 13 attendees for the RDTF meetings!
