

•Highlights from this Meeting:

- Continued drafting scope and requirements for a telemetry display page exchange format..
- Received presentations of the two CubeSat System Reference Model (CSRM) RFP submissions from INCOSE and Sparxsystems. After both presentations we held a collaboration discussion with the LOI submitters, and believe that the submitters have agreed on collaboration for a joint revised submission, if the copyright concerns can be worked out.

•**Deliverables from this Meeting:**

–None

–

•**Future Deliverables (In-Process):**

- GEMS 2.0 RFP
- Telemetry Display Page Exchange RFP

•**Votes**

– None

•**Agenda Items for the Next Meeting (Ottawa/Seattle):**
